RE: Facility ID No. 023-00001, Idaho Nuclear Technology and Engineering Center (INTEC),  
Idaho Falls  
Completeness Determination of PTC Application

Dear Ms. McCollum:

On May 3, 2007, the Department of Environmental Quality (DEQ) received your Permit to Construct application for the increase in yearly operational hours of the Air Compressor COM-TTI-616 at INTEC. The application materials have been reviewed, and the application determined complete. Therefore, DEQ will proceed with the processing of this permit application in accordance with IDAPA 58.01.01.200 (Rules for the Control of Air Pollution in Idaho)(Rules).

Although the application has been declared complete, it may be necessary to solicit further information to assist us during our review. The permit evaluation phase may take up to 60 days, although the application will be processed as expeditiously as our resources allow. Please be aware that you may submit a written request to DEQ to provide a draft permit for review prior to issuance of a final permit in accordance with IDAPA 58.01.01.209.01.b.i. (Rules). Additionally, an opportunity for a public comment period will be provided in accordance with IDAPA 58.01.01.209.01.c. (Rules). Should a comment period be required, at least 45 days will be added to the time needed to process your application.

If you have any questions about this letter or about the air quality permitting process, please contact me at (208) 373-0502.

Sincerely,

Robert Baldwin
